	Recent answers Typescript: Index signature is missing in type casting, typescript Pescolved Ts wants us to define the type of the index. For example, to tell the compiler that you can index the object with any string, e.g. myobj['anystring'], change: interface myInterface { myval: string; (1 more line was trimmed) 16 □ 0 □ 3 ⊟ 27/12/2020
	Property 'value' does not exist on type 'EventTarget' ↑ angular, typescript, properties Properties Resolved In my case, I had: const handleonChange = (e: ChangeEvent) => { doSomething(e.target.value); (1 more line was trimmed) And the issue was that I did not provide a type argument to ChangeEvent so that it knows e.target was an HTMLInputElement. ↑ 2 ♀ 0 ♀ 1 ☆ 19/02/2021
	JSC_REDECLARED_VARIABLE_ERROR when using gulp closure compiler plugin S javascript, typescript, gulp, google-closure-compiler Tryenv custom orisolation_mode IIFE . I ran into this when compiling code that conflicted with browser interfaces like Node . S 0 ♥ 0 ♥ 1 ☐ 24/12/2020
	My code should be detecting if a string has currency symbols, but it will not detect £ ⇒ javascript, arrays, for-loop, if-statement Properties and Propert
	Problem calling functions within case and if loop linux, bash, unix Per @vgersh99, overwrite() and restoreDir() make use of the variable which refers to each function's first argument. You could back the top-level \$1 variable up to a global like FILE_LOCATION and reference that, or simply pass it to your functions as needed: 10 0 □ 0 □ 1 □ 28/07/2020
