Recent answers Typescript: Index signature is missing in type casting, typescript Resolved TS wants us to define the type of the index. For example, to tell the compiler that you can index the object with any string, e.g. (my0bj['anyString'], change: interface myInterface { myVal: string; (1 more line was trimmed) 14 ♀ 0 ♀ 3 ☆ 27/12/2020
Property 'value' does not exist on type 'EventTarget' ⇒ angular, typescript, properties Pesolved In my case, I had: const handleonchange = (e: ChangeEvent) => { dosomething(e.target.value); (1 more line was trimmed) And the issue was that I did not provide a type argument to ChangeEvent so that it knows e.target was an HTMLInputElement. ↑ 2 ♀ 0 ♀ 1 ☆ 19/02/2021
JSC_REDECLARED_VARIABLE_ERROR when using gulp closure compiler plugin Solution javascript, typescript, gulp, google-closure-compiler Tryenv custom orisolation_mode IIFE . I ran into this when compiling code that conflicted with browser interfaces like Node . Solution javascript of the property of the proper
My code should be detecting if a string has currency symbols, but it will not detect £ □ javascript, arrays, for-loop, if-statement □ Resolved If you don't want to use regex, just check if the string includes a symbol, increment a counter, and return whether or not there was exactly 1 match: let testA = "\$£50", testB = "£50", (17 more lines were trimmed) □ □ □ □ □ □ □ □ □ □ □ □ 17/07/2020
Problem calling functions within case and if loop linux, bash, unix Per @vgersh99, overwrite() and restoreDir() make use of the variable which refers to each function's first argument. You could back the top-level \$1 variable up to a global like FILE_LOCATION and reference that, or simply pass it to your functions as needed: □ 0 □ 0 □ 1 □ 28/07/2020
