⤴ Typescript: Index signature is missing in type

🏷 casting, typescript   ✔ Resolved

TS wants us to define the type of the index. For example, to tell the compiler that you can index the object with any string, e.g. `myObj['anyString']` , change:

```
interface myInterface {
  myVal: string;
(1 more line was trimmed)
```

⤴ How get real char code from an emoji in JavaScript?

🏷 javascript, emoji, fromcharcode   ✔ Resolved

`String.codePointAt()` and `String.fromCodePoint()` are made for this, though it is also possible to specify a UTF-16 `charCode` in legacy browsers using surrogate keypairs (see the discussion here).

```
let emoji = "",
        charCode = emoji.charCodeAt(),
(11 more lines were trimmed)
```

⤴ Property 'value' does not exist on type 'EventTarget'

🏷 angular, typescript, properties   ✔ Resolved

In my case, I had:

```
const handleOnChange = (e: ChangeEvent) => {
  doSomething(e.target.value);
(1 more line was trimmed)
```

And the issue was that I did not provide a type argument to ChangeEvent so that it knows `e.target` was an `HTMLInputElement` .
